A Message from our Principal

Greetings Westside Families,

It was nice seeing many of you at our PTO's 80's dance this past Friday. I would say it was a complete success, minus my poor showing in the hula-hoop contest. I was overconfident and ended up in third place. That is not a good representation of my hula-hoop skills! Along with a successful dance we had some parents looking 80srific! Thank you for coming and celebrating in the Westside community!

Those of you that were in attendance may have seen the bake sale run by a few of our 3rd graders. Their sale raised \$230 for St. Jude's Children's Hospital. Cole and Jacob came up with the idea on their own in 2nd grade and have turned this into quite the tradition. We are all very proud of these boys' compassion and caring for others. They truly exemplify the Westside culture.

Lastly, we want you to know that your children are VERY special to us and because of that, safety is our priority and always on our minds. We continually update staff on safety procedures, conduct drills and monitor our security. In our notes this week you will find some visitor reminders that we would like all parents to look over.

As always, feel free to contact me with any questions or concerns.

WHEN TO KEEP YOUR CHILD HOME

Children should be kept home from school when they don't feel well. It is important to get the rest they need to recover, and to prevent the spread of germs to other children and the staff. If you are unsure of when to keep your child home, please contact the school nurse or your family medical provider.

The following symptoms may suggest a communicable disease. Children who have the following symptoms should be kept home from school until a doctor has seen them, they no longer have symptoms indicating a communicable disease or they have received treatment for at least 24 hours for certain diseases.

Fever: An oral temperature of 100.00 or higher indicates a fever. If your child has a temp of 100.00 or higher at school he/she will be sent home. Your child should be fever free for 24 hours without the use of a fever reducer (Tylenol or Ibuprofen product) before he/she returns to school.

Strep Throat: If a fever is accompanied by a sore throat, stomach ache or head ache it may be strep throat. Strep throat is diagnosed by a throat culture obtained at a medical clinic. If your child is diagnosed with strep throat, your child must be on appropriate antibiotics for 24 hours and fever free for 24 hours without the use of a fever reducer (Tylenol or Ibuprofen product) before he/she returns to school.

Vomiting and diarrhea: If your child has an episode of vomiting and diarrhea at school, he/she will be sent home. Anyone with these symptoms should stay home until symptoms are absent for 24 hours. If student reports vomiting or diarrhea, may be allowed to rest in the health room, to observe for other signs of illness before sending home.

Eyes: Pink eye or conjunctivitis appears as a pinkish sclera (white of the eye), it is usually itchy and painful. Drainage or crust may form on the eyelids. Student may attend school unless he/she has a fever, behavioral changes, or is unable to avoid touching his/her eyes. Antibiotics are not required for return to school.

Skin problems: Rashes and infected sores needed to be diagnosed by a medical provider. Many skin rashes such as impetigo, scabies, chicken pox, Fifth disease or Hand Foot and Mouth disease are very contagious. Students may return to school once the rash has been diagnosed and treated for 24 hours or cleared by a doctor. Open sores from illnesses such as chicken pox and impetigo may need to be covered at school with bandages for several days.

Cough: A cough may be a sign of many different illnesses. If a cough is accompanied by a fever, sore throat, body aches or any other symptoms you should keep your child home. Any cough that lasts for more than several days should be discussed with a doctor.

Lice: If live lice are found on a student at school, the student will be sent home for treatment. The child may return after a treatment and no live lice are found on the head. If you discover lice at home, please contact the school nurse to discuss the best way to get rid of lice and determine when your child may return to school.
