# STUDENT ILLNESS GUIDE AND WHEN TO GET TESTED

People with the below symptoms or combination of symptoms may have COVID-19. The table below outlines WI-DHS recommendations of who should receive COVID-19 testing in Wisconsin. If you have these symptoms, **stay home, call your school office and get tested.**

## Box A (any one symptom present)

- Cough (above baseline)    Shortness of breath or difficulty breathing    New loss of taste or smell

OR

## Box B (any two symptoms present)

- Congestion or runny nose (above baseline)    Chills or fever (100.4)    Nausea or vomiting  
 Diarrhea    Fatigue    Muscle or body aches    Sore throat (above baseline)

*\*If you choose not to get tested, you must remain home until at least 10 days have passed since symptom onset AND at least 24 hours have passed since resolution of fever without use of medicine AND other symptoms have improved.*

OR

## Box C

- I am a close contact of someone with COVID-19

*WI-DHS recommends getting tested if you are a close contact. If you test negative during your quarantine period, you will still need to complete your full 14-day quarantine before it is safe to go back to school or be around others*

For all other illnesses, follow typical school illness protocol by staying home, calling the school office and once your child is 24 hour symptom free they may return.

# CLOSE CONTACT GUIDE

## What does it mean to be a close contact of someone with COVID-19?

You are a “close contact” if any of the following situations happened while you spent time with the person with COVID-19, even if they didn't have symptoms:

- ✓ Had direct physical contact with the person (for example, a hug, kiss, or handshake)
- ✓ Were within 6 feet of the person for more than 15 minutes
- ✓ Had contact with the person's respiratory secretions (for example, coughed or sneezed on; contact with dirty tissue; shared a drinking glass, food, towels, or other personal items)
- ✓ Live with the person or stayed overnight for at least one night in a household with the person

### EXAMPLE

Your child was playing outside with a neighborhood friend when he drank from the friend's water bottle without thinking. The following day, the friend developed symptoms and subsequently tested positive for COVID-19. **Your child is a close contact.**

### EXAMPLE

I went out to eat with a friend yesterday and we were within 6 feet of each other for 30 minutes. The following day my friend tested positive for COVID-19. I am now a close contact. What about my child? **Your child is NOT a close contact** as your child did not spend time with your friend.

If you had contact with someone who has been diagnosed with COVID-19 you may be at risk of infection. Follow these recommendations for 14 days since your last close contact with someone with COVID-19. It is important to **self-quarantine and self-monitor** to protect yourself, your family, and your community.

## As a close contact, what does it mean to quarantine?

- Stay home
- Avoid travel
- Go out only if absolutely necessary
- Postpone all non-essential medical appointments until your quarantine is over
- Do not use public transportation, ride-sharing, or taxis
- Wear a face cover when you are around others

It sometimes can be difficult to define:

- Take your time to pay attention to your surroundings and to the behaviors of others around you.
- Know what suspicious or concerning behaviors look like.
- Does the activity look strange to you?
- Are you worried someone you know is thinking about hurting others or themselves?

**Report it, don't just repeat it.**
